

Contents

1. Energy and heat flow on mm-spaces	5
1.1. Preliminaries	5
1.2. Weak upper gradients	10
1.3. Minimal weak upper gradient and AGS energy	12
1.4. Identifying various notions of energies and Sobolev spaces	16
1.5. Laplacian	20
1.6. Heat semigroup	23
1.7. Geometric properties for the heat flow on mm-spaces	25
1.8. Based Sobolev space and based heat flow	30
2. Dirichlet spaces	31
2.1. Quadratic forms and symmetric bilinear forms	31
2.2. Operators, semigroups, and resolvents	33
2.3. Dirichlet forms	37
2.4. Quasi-regular Dirichlet spaces	44
3. Dirichlet spaces and mm-spaces	48
3.1. Infinitesimally Hilbertian mm-spaces	48
3.2. From Dirichlet spaces to mm-spaces and vice versa	53
3.3. Dirichlet mm-spaces	58
4. Examples	58
4.1. One-dimensional and radial symmetric spaces	58
4.2. Metric graphs	60
4.3. Elliptic diffusions on $\mathbb{R}^n$	62
4.4. Riemannian manifolds	65
4.5. Alexandrov spaces	67
4.6. Finsler spaces	67
4.7. Lie groups	68
4.8. Spaces of probability measures	70
4.9. Outlook: Extended metric-topological measure spaces	72
4.10. Outlook: Fractals, random media and discrete spaces	73
5. Geometric estimates for Dirichlet mm-space	73
5.1. Unit propagation speed for wave propagators	74
5.2. Decay estimates for heat semigroup and resolvent	76
5.3. Bounds for spectrum and essential spectrum	79
5.4. Capacity estimates	83
5.5. Recurrence criteria	87
5.6. Conservativeness criteria	88
6. Transformations of Dirichlet spaces and mm-spaces	93
6.1. Dirichlet boundary conditions	93
6.2. Neumann boundary conditions	95
6.3. Change of measure	99
6.4. Change of metric, time change, conformal change	107
7. Constructions	114
7.1. Gluing of mm-spaces	114

7.2. Quotients	124
7.3. Products, cones, suspensions	142
7.4. Limits	152
7.5. Time-dependent Dirichlet spaces	160
8. Dirichlet mm-spaces of Harnack type	163
8.1. Poincaré and Sobolev inequalities	167
8.2. Subsolution estimates and upper heat kernel bounds	169
8.3. Parabolic Harnack inequality	177
8.4. Gaussian lower bound for the heat kernel	179
8.5. Parabolic regularity theory for time-dependent Dirichlet spaces	180
8.6. From Gaussian estimates to Poincaré and doubling	181
8.7. Green function estimates, Neumann Laplacian	182
9. Notes	183
Bibliography	187
